EDUCATION

Centre For Development of Advanced Computing

August 2023

Post graduate diploma in big data analytics

75 %

Zeal Education Society's DCOER

August 2015

Bachelor of Engineering in Mechanical Engineering

66.66 %

RELEVANT COURSEWORK

Course Name: Big Data Analytics

Modules: Linux And Cloud Computing, Object-Oriented Programming with Java, Python and R Programming, Advance Analytics Using Statistics, Data Visualization - Analysis And Reporting, Data Collection And DBMS, Big Data Technologies, Practical Machine Learning

TECHNICAL SKILLS

Languages: Python, R, Java, C/C++

Libraries: pandas, NumPy, Matplotlib, seaborn, scikit-learn, PySpark

Cloud/Databases: MySQL, MongoDB, AWS, Docker

Development Tools: Git/GitHub, Bash Shell, Tableau, Microsoft Excel, Jupyter Notebook, Google Colab

PROJECTS

Network Anomaly Detection System | *Python, Flask API, Git, AWS*

August 2023

- The Network Anomaly Detection System (NADS) project combines Python programming and Machine Learning techniques to develop an effective network security solution
- The NADS system consists of three main components: data collection, feature engineering, and anomaly detection
- Post the hyperparameter tuning of the algorithms, The best Model was deployed on AWS with the help of Flask API

Peer to Peer Lending Analysis | *Python, Git*

September 2023

- This study explores a loan dataset from a peer-to-peer lending platform with 114,000 loans and 81 variables
- It investigates loan amounts, interest rates, borrower characteristics, and loan categories and various other features with univariate and bivariate analyses
- The objective is to extract valuable insights that can empower investors and borrowers by providing a deeper understanding of loan dynamics and risk factors within the ecosystem

Bike Sharing Membership Convergence | *R Programming, Tableau*

October 2021

- Conducted data analysis on the bike sharing data to gain insights to convert casual riders into members
- Used R programming language for data pre-processing and visualization dashboards were created using Tableau

EXPERIENCE

Flextronics | *Senior Analyst*

December 2015 – May 2021

- Lead two kaizen workshops of process improvement which resulted in 20% and 75% process time improvement respectively along with 2 FTE savings
- Five-Why analysis, Pareto, PDCA, Value stream mapping and Microsoft Excel VBA were employed in these projects
- Productivity Metrics analysis & improvement. Lead implementation of solutions that drove efficiency through standardization, elimination, and simplification.

Sakon | *Senior Analyst*

May 2021 – March 2022

- Responsible for understanding and building wireline inventory across global telecommunication providers. Maintaining the inventory and raising flags in case of discrepancies
- Performed various analytical and reporting functions using proprietary tools and software
